People compendium (HR only)

The people team owns promotions, compensation reviews, policy exceptions, and employee relations. Salary conversations are confidential and are never shared outside HR. Hiring managers receive only the minimum data required for their process.

Topic	Owner	Cadence
Comp review	HRBP	Twice yearly
Promotion	People partner	Monthly
Offer approval	HR	Daily

Benefits and leave (HR only)

Benefit questions are answered with the latest policy memo, not memory. The people team publishes a monthly FAQ for exceptions, parental leave, and bereavement leave. Only HR can edit benefit policy text.

Performance and calibration

Calibration notes are stored in a separate workspace. Every review cycle ends with a calibration meeting, a manager follow-up, and a documentation sweep. HR keeps a list of approved rating exceptions for audit.

Offer workflow

Compensation bands are checked before an offer is drafted. The recruiter sends the draft to HR, HR validates it against the band, and the hiring manager confirms the level. If the band is outside range, the offer is returned for revision.

Employee relations

Sensitive cases are handled by the people partner and legal counsel. The case log records date, owner, action, and next step. Escalations remain confidential until the case is closed.
